

SUDAX™ SX 114BMR

Robust, broadly adapted multi-cut hybrid
 Brachytic dwarf growth habit
 High quality BMR hybrid
 Excellent leaf disease package
 Superb regrowth after cutting

Agronomic Description

Primary Cropping System Multi-Cut
 Relative Maturity n/a
 Midrib Brown
 Double Crop Fit Excellent
 Dryland Fit Very Good
 Emergence Score Excellent
 Dryland Planting Rates 10-14 lbs/ac
 Irrigated Planting Rates 18-22 lbs/ac

2019 Brachytic Data

	T / Ac @ 30% Mst uNDF	
SX 114BMR	12.4	29.3

Head Smut	-	-	
Common Rust	-	-	

**NOTE: Shaded cells indicate significant advantage at 0.10 LSD*

Areas of Adaptation

Primary Market
 Secondary Market

SX 114BMR is a brachytic Multi-Cut BMR hybrid broadly adapted east to west and provides very good tonnage with excellent quality; its brachytic nature helps manage agronomic risks like lodging. SX 114BMR is best suited to higher management conditions with regular cutting intervals.
